Your security system provides quick access to functions by To exit the Menu List, press the Your keypad emits one of several distinct tones and displays 2. Fire alarms are the highest priority events. When a fire point The group with the highest priority scrolls first in the keypad's activates, your keypad emits a pulsating highpitched fire tone. When a burglary. The audible alarm sounds for a specific period of time before it automatically shuts off. Some of these functions may not be available in your system. Please consult your security company to determine which commands have been made available to you. When you use a command to perform a function, the displays in the function list below do not appear at your keypad. Windows Open If a protected door or window is open, you may have the option of "force arming". After arming the perimeter without delays, you cannot enter or exit the premises without disarming the system. The keypad will display Watch mode is now off. When exit delay time expires and the system turns on, the display shows Perimeter On Partial. Since Figure 7 Escape routes stairwells and hallways may be blocked during a fire, exiting through a bedroom window must be a part of the escape plan. Your control panel may not contact your security company to determine whether repairs be operating properly. Comm Fail Route Grp1 Route. Your Station A group of detection devices connected to your Area security system may be programmed to contact security system. Force the correct point and disarm the area. Points display individually at the keypad with custom text. The text can describe a single door, motion sensor, smoke detector, or an area such as UPSTAIRS or GARAGE. Bosch Solution Alarm Keypad Keeps Beeping If you encounter nuisance beeping coming from the keypad this means you will have a fault

condition. The beeps will be heard at oneminute intervals, and either a FAULT light or an exclamation mark trouble indicator icon will flash on the keypad.<http://landingoa.com/propertiespulse/fckeditorimages/compaq-presario-2110-manual.xml>

To remove the fault altogether, you will need to diagnose and correct the issue causing it. Fault Analysis Solution Series alarm systems have a comprehensive index of possible faults to indicate just about any abnormal or undesirable condition. Take note of the numbers that display, indicating the general faults. If multiple numbers show at Step 2, you will need to run Fault Analysis multiple times to look into each one as per Step 3. For a more accurate list of faults and their descriptions, please refer to the specific manual for your system, as Fault Analysis Mode will vary slightly, depending on the model of your alarm panel. Help us improve this article with your feedback. Our comprehensive portfolio includes fire alarm, sprinkler, suppression, access control, intrusion and video systems; testing, inspection, maintenance and repair services; and monitoring solutions.
