The Product purchased with this limited warranty is the only PowerShot Digital Camera to which this limited warranty applies. Warranty exchange or replacement does not extend the original warranty period of the Product. The sole warranty, if any, with the respect to such nonCanon brand items is given by the manufacturer or producer thereof. This limited warranty covers all defects encountered in normal use of the Products, and does not apply in the following cases

A Canon Customer Care representative will attempt to diagnose the nature of the problem and correct it over the telephone. If the problem cannot be corrected over the telephone, you will be asked to follow the applicable procedures for MAILIN SERVICE. Note that a dated proof of purchase is required at the time of service. MAILIN SERVICE is a program under which your Product is repaired by a Canon U.S.A. or a Canon Canada authorized service center for the Product. You will be given the name, address and phone number of an authorized service center. <http://www.mahalaxmiornament.com.np/userfiles/dunlop-tremolo-manual.xml>

The latter part of this chapter explains how to shoot and view movies and transfer images to a computer. To protect the battery and prolong its life, do not charge it for longer than 24 hours continuously. Since the dates and times recorded into your images are based on these settings, be sure to set them. What if the clock appears when the m button is pressed. The clock will display if too

much time passes between pressing the m button and the n button in Step 2. Formatting initializing a memory card erases all data on the memory card. As you cannot retrieve the erased data, exercise adequate caution before formatting the memory card. To take images that are in focus, be sure to first press the shutter button lightly halfway to focus, then take the shot. The camera can also detect and focus on faces, setting the color and brightness to optimal levels. Pressing the l button while turning on the camera power will turn off all sounds except for warning sounds. The subject is too far away for the flash to reach. Switching images quickly Select the playback mode. Please note that erased images cannot be recovered. Exercise adequate caution before erasing an image. Select the playback mode. Select an image to erase. Canon Brand PictBridge Compliant Printers Sold Separately By connecting your camera to one of the Canon brand PictBridge compliant printers below, you can print your images without having to use a computer. If you continue shooting for a long time, the camera may become warm. This is not a malfunction. Shooting Time Set the mode switch to E. When watching a movie on a computer, frames may drop, it may not play smoothly, and the audio may stop suddenly depending on the computer's capabilities. If you use the supplied software to copy the movie back onto the memory card, you can play back the movie smoothly. Install the software. Windows Place the DIGITAL CAMERA Solution Disk in the computer's CDROM drive.

This product is designed to achieve excellent performance when used with genuine Canon accessories. Some accessories are not sold in some regions, or may no longer be available. Recommended for powering the camera for an extended period of time or when connecting to a computer. However, the brightness of the image on the screen, and the brightness of the actual image recorded may be different. Selectable Options Menu Items Display the FUNC. The menu items are organized under tabs, such as for shooting 4 and playback 1. Muting Sounds Adjusting the Volume Display the menu. Are there functions that cannot be reset. Low level formatting a memory card completely erases all data on the memory card. As you cannot retrieve the erased data, exercise adequate caution before low level formatting the memory card. Power Saving during Shooting The monitor will turn off approximately 1 minute after the camera is last operated. Set the mode switch to 4 p. 42. Select the desired shooting mode. What if the indicator blinks orange and a flashing appears. When you press the shutter button halfway in low light conditions where camera shake is likely, the indicator will blink orange and a flashing screen. Once inserted, however, they cannot be deleted. The camera will activate approximately 10 seconds after the shutter button is pressed. You can change the delay time and number of shots p. 79. Press the p button. What if a face is not detected. Even if your face is not detected after joining the subjects, the shutter will release approximately 30 seconds later. Be sure to use the flash when shooting. AE stands for Auto Exposure. What if the shutter speed and aperture value are displayed in red. If a correct exposure cannot be obtained when pressing the shutter button halfway, the shutter speed and aperture value display in red. However, you can zoom in even closer on the subject using the digital zoom. The digital zoom may cause images to appear coarse at some recording pixel settings p.

<https://congiendis.vn/vi/bosch-logixx-wis28440gb-manual>

If you select Converter p. 61. Changing the Compression Ratio Image Quality You can select from the following two levels of image quality Fine, Normal. Select the recording pixels. Shooting is fun and easy with Smart AUTO that makes all your shots better effortlessly, and there's a new userfriendly interface. And see how much fun it is to browse through your photos and even speed up image advance with a shake or tilt of the camera. PowerShot SD970 IS Highlights 12.1 megapixels plus 5x optical zoom with Optical Image Stabilizer Canon's commitment to innovation defines the excitement of the PowerShot SD970 IS Digital ELPH. 12.1megapixel resolution is more than a number, it's your cuttingedge link to the outstanding clarity and quality you've always wanted in your images. Think bold and big, because razorsharp, oversized prints are a breeze. Get the picture It's absolutely brilliant. The PowerShot SD970 IS Digital ELPH has a 5x optical zoom lens that makes it easy to get the inspiring, emotive closeups that will make your images lasting keepsakes. This magnificent lens gives you the power to shoot distant subjects with razorsharp precision and stunning lifelike color. So you can brilliantly capture a bird high atop a tree, a child's winning goal from across the stadium or a school play from the last row. The PowerShot SD970 IS Digital ELPH is equipped with Canon's acclaimed Optical Image Stabilizer Technology that automatically detects and corrects camera shakeone of the leading causes of fuzzy or blurred shots. Even when zoomed in, you can get the steady, crisp, brilliant images you'll be proud to shoot and share. And Canon's Optical Image Stabilizer Technology is so convenient to use. It functions perfectly with or without a flash. HD movie shooting capability plus HDMI output The PowerShot SD970 IS Digital ELPH lets you record video in beautiful high definition 1280 x 720 pixels. The camera also makes it easy to enjoy HD movies and still photos on your HDTV with a miniHDMI connector for direct connection to a highdefinition monitor.

You'll enjoy the HD experience with no degradation of image or audio in the signal, plus the ability to display up to 130 still images at once. Smart AUTO intelligently selects the proper settings Just set the Canon PowerShot SD970 IS Digital ELPH to Smart AUTO and you're ready for maximum enjoyment from your picture taking every time. It's a relaxing and satisfying way to shoot because you can completely concentrate on your subject knowing that the camera has the technical details covered. Advanced Canon technology intelligently analyzes your situation and shooting conditions. Then it automatically selects an appropriate setting from 18 specially defined settings. So whether you're photographing flowers, a captivating sunset, or your friends at the park, you can be confident that you're getting dramatic, memorable images. Shooting Modes Advanced presets for the best possible photos under certain conditions. With 20 Shooting Modes, you're ready for whatever shot comes your way. New Active display technology Active Display is a fun new feature powered by an accelerometer built into the PowerShot SD970 IS Digital ELPH. When browsing through your images in playback, just give the camera a quick shake to advance or return images one frame at a time. Tilting the camera will activate continuous image advance, and tilting at a further angle will

make the images advance more quickly. Simply tilt the SD970 IS to advance images Zoom Blur and Creative Light Effect produce fun, original effects Zoom Blur is a classic photo effect that takes some technical skill to create, whether on film or in the editing process. But the PowerShot SD970 IS Digital ELPH's new Zoom Blur feature makes the look easy to achieve. Simply shoot with the feature activated, and the camera zooms during exposure for a great effect.

Creative Light Effect Special Scene mode can turn your image into a whimsical work of art by changing twinkling light sources in the background of night scenes into stars, hearts or other shapes. Large, highquality 3.0inch PureColor LCD II with wide viewing angle The PowerShot SD970 IS Digital ELPH gives you large 3.0inch LCD screen for excellent control when framing your shots. Canon's highquality PureColor LCD II 461,000 dots offers spectacular color, resolution and contrast even when viewed at an angle. The screen is highly durable and easy to see in any light with a scratchresistant, antireflective coating. It also features Night Display for easy viewing in low light a perfect feature for gathering friends and family around to see your images. A World of Advantages with Canon's Technology Canons DIGIC 4 image processor has evolved Face Detection Technology that tracks the faces of moving subjects and lets the shooter enter the frame seamlessly with the Face Detection SelfTimer. DIGIC 4 Image Processor Canon's most advanced image processor, DIGIC 4, delivers evolved Face Detection Technology that keeps every face in every photo looking its very best. The technology finds and tracks the faces of moving subjects until you're ready to shoot, then delivers perfect focus. In addition, exposure, flash and white balance are compensated, so that faces exhibit natural skin tones and backgrounds are properly exposed. Using an internal database of thousands of different photos, iSAPS works with the advanced DIGIC 4 image processor to improve focus speed and accuracy, as well as exposure and white balance. A Face Detection SelfTimer automatically detects an increase in the number of faces and makes the appropriate adjustments. For instance, to include the photographer's face in a group shot, there's no need to rush in.
